CONTENTS

JULY 1, 1931

Scattering of X-rays by Gases and Crystals — G. E. M. Jauncey 1
Temperature and Diffuse Scattering of X-rays from Crystals — Y. H. Woo 6
Experimental Electron Distributions in Atoms of Monatomic Gases — E. O. Wollan 15
Anomalous Scattering of Alpha-Rays — Morris Muskat 23
Reflecting Power and Grating Efficiency in the Extreme Ultraviolet — H. M. O'Bryan 32
Atomic Scattering Power of Copper and Oxygen in Cuprous Oxide — G. A. Morton 41
Analysis of Photoelectric Sensitivity Curves for Clean Metals at Various Temperatures — R. H. Fowler 45
Relativistic Theory of the Photoelectric Effect — Harvey Hall and J. R. Oppenheimer 57
Transmission of Electrons through Potential Barriers — N. H. Frank and L. A. Young 80
Λ-Type Doubling and Electron Configurations in Diatomic Molecules — Robert S. Mulliken and Andrew Christy 87
Inverse-Cube Central Force Field in Quantum Mechanics — George H. Shortley 120
Spectrum of Doubly Ionized Carbon, C III — I. S. Bowen 128
Electro-optical Kerr Effect in Gases — E. C. Stevenson and J. W. Beams 133
Raman Spectra of Certain Organic Liquids — Charles S. Morris 141
New Absorption Bands of Ammonia, Methyl Bromide, Methyl Iodide and Carbon Dioxide in the Infrared Spectrum — W. W. Sleator 147
Transmission of Visible Light through Fog — H. G. Houghton 152
Theoretical Investigation of the Transmission of Light through Fog — J. A. Stratton and H. G. Houghton 159
Interference in Thin Metallic Films — Hiram W. Edwards 166
Magnetic Moment of the Diatomic Sulfur Molecule — E. J. Shaw and T. E. Phipps 174
Thermocouples whose Elements are Longitudinally and Transversely Magnetized Wires of Nickel and of Iron — William H. Ross 179
P-V-T Relations of NH_4Cl and NH_4Br, and in Particular the Effect of Pressure on the Volume Anomalies — P. W. Bridgman 182
Letters to the Editor — 192

Transverse Barkhausen Effect in Iron, *R. M. Bozorth and J. F. Dillinger*—192; On the Elastic Scattering of Electrons by Spherically Symmetrical Atoms, *F. W. Doermann and Otto Halpern*—193; Excitation of High Optical Energy Levels, *J. E. Mack*—193; The Scattering of X-rays from Polyatomic Gases, *G. E. M. Jauncey*—194; The Effect of Internal Stress on Magnetic Susceptibility, *C. W. Heaps and H. E. Banta*—195; The Entropies of Methane and Ammonia, *W. F. Giauque, R. W. Blue and Roy Overstreet*—196; Electronic Velocities in the Positive Column of High Frequency Discharges, *Egon Hiedemann*—198.

Book Reviews — 199

JULY 15, 1931

Resolving Power Attainable in X-ray Spectroscopy by Photographic Methods — Samuel K. Allison 203
500 Kilovolt Cathode Rays — R. E. Vollrath 212
X-ray Absorption Coefficients of Mercury Vapor in the Region of its *L*-Absorption Discontinuities — Fred M. Uber 217
Many-Electron Selection Rules — S. Goudsmit and L. Gropper 225
Quantum Theory of the Equation of State — J. C. Slater 237
Quantum Theory and Electron Pair Bond — W. Heitler 243
Note on the Calculation of Zero Order Eigenfunctions — Newton M. Gray and Lawrence A. Wills 248
Calculation of Interaction between Atoms with s-Electrons — N. Rosen 255
Low Velocity Inelastic Collisions — Clarence Zener 277
Probability Law Governing Ionization by Electron Impact in Mercury Vapor — Curtis R. Haupt 282
On the Temperature of Cathode in Vacuum Arc — R. Tanberg and W. E. Berkey 296
Wave-Length Standards in the Spectra of Carbon and Tin in the Schumann Region — R. V. Zumstein and D. S. Marston 305
Some Remarks on the Theory of the Photoelectric Effect — J. Frenkel 309
Photoelectric Properties of Thin Unbacked Gold Films — Ralph P. Winch 321
Note on the Structure of the Groups XO_3 — J. C. Slater 325
Effect of Temperature upon the Ultraviolet Band Spectrum of Ozone and the Structure of this Spectrum — Oliver R. Wulf and Eugene H. Melvin 330

Concerning the Reflection Power of Metals in Thin Layers of the Infrared — R. Bowling Barnes and M. Czerny 338
Stereophotographic Models of Electron Motion in Stark Effect — R. W. Wood 346
Crystal Structure of Arsenic Triiodide, AsI_3 — Dorothy Heyworth 351
Magnetic Moment of the Palladium Atom — A. N. Guthrie and M. J. Copley 360
Surface Energy of Liquids — Henry Margenau 365
Letters to the Editor — 372

The Rotational Analysis of the First Positive Nitrogen (N_2) Bands, *S. Meiring Naude*—372; Forced Predissociation in Nitrogen, *Joseph Kaplan*—373; Removal of Continuous Background from Raman Spectrum of Carbon Tetrachloride, *M. E. High and M. L. Pool*—374; Calculation of Effective Nuclear Magnetic Moments from Hyperfine Structure, *S. W. Nile*—375; A More Fundamental Thermodynamics, *Gilbert N. Lewis*—376; Oscillations in Discharge Tubes, *W. L. Brown and H. McN. Cowan*—376; Photoelectric and Metastable Atom Emission of Electrons from Surfaces, *Carl Kenty*—377.

AUGUST 1, 1931

Effect of Electric Fields on the Emission of Photoelectrons from Oxide Cathodes — W. S. Huxford 379
Some Photoelectric Properties of Mercury Films — Duane Roller, W. H. Jordan and C. S. Woodward 396
Effect of Adsorbed K^+ Ions on the Photoelectric Threshold of Iron — A. Keith Brewer 401
Photoelectric Properties of Zinc Single Crystals — J. H. Dillon 408
Fall of Potential in the Initial Stages of Electrical Discharges — J. C. Street and J. W. Beams 416
Cathode Fall of an Arc — R. C. Mason 427
Experimental Test of the Ionization Chamber Method of Measuring the Relative Intensities of X-ray Spectrum Lines — Samuel K. Allison and Victor J. Andrew 441
Ionization of Helium, Neon and Argon — R. L. Womer 454
Infrared Spectrum of Sn I — H. M. Randall and Norman Wright 457
On the Hyperfine Structure of Heavy Elements — G. Breit 463
Effect of Hyperfine Structure on the Polarization of Cadmium Resonance Radiation — Allen C. G. Mitchell 473
Absorption Line Width in Sodium Vapor — S. A. Korff 477
Selective Thermal Radiation of Colored and Pure Fused Quartz — R. W. Wood 487
Canonical Transformation and the Vibrations of a Loaded String — R. B. Lindsay 491
Motion of a Dirac Electron in a Magnetic Field — L. D. Huff 501
Pictorial Representations of the Dirac Electron Cloud for Hydrogen-Like Atoms — H. E. White 513
Temperature Variation of the Electric Moment of Ethylene Chloride — C. T. Zahn 521
Magnetization and the Magneto-Caloric Effect — Francis Bitter 528
Mobilities of Na^+ Ions in N_2 and H_2 as a Function of Time — Leonard B. Loeb 549
Letters to the Editor — 572

An Interpretation of the Effect of Piezoelectric Oscillations on the Intensity of X-ray Reflections from Quartz, *B. E. Warren*—572; Corrected Relative Intensities of the X-ray Lines in the Tantalum *L*-Series, *Victor Hicks*—572; X-ray Reflections from Oscillating Crystals, *R. M. Langer*—573; The Enhancement of Predissociation by Collisions, *Louis A. Turner*—574; The Relative Abundance of N^{14} and N^{15}, *Harold C. Urey and George M. Murphy*—575; The Second Virial Coefficient, *J. G. Kirkwood and F. G. Keyes*—576.

Book Reviews — 578

PROCEEDINGS OF THE AMERICAN PHYSICAL SOCIETY

Pasadena Meeting, June 15–20, 1931; Minutes and Abstracts, Author Index — 579

AUGUST 15, 1931

Diffuse Scattering of X-rays from Sylvine — G. G. Harvey 593
Effect of Temperature on the Intensity of X-rays Diffusely Scattered from Rocksalt — W. D. Claus 604
Additional Theory of the Double X-ray Spectrometer — Roy C. Spencer 618
Study of the Shape of the Ag *L*, Mo *K* and Cu *K* Lines — Roy C. Spencer 630
Broadening of the Resonance Atomic Line of Helium — Walter Weizel 642
Perturbations in the Helium Band Spectrum — G. H. Dieke 646
Absorption Band Spectra of Silver Bromide and Silver Iodide Vapors — Brooks A. Brice 658
Diagram of Some of the Energy Levels of Gadolinium IV in the Crystal Lattice as Obtained from the Ultraviolet Absorption Spectra of $GdCl_3 \cdot 6H_2O$ and $GdBr_3 \cdot 6H_2O$ — Simon Freed and Frank H. Spedding 670
Dissociation of Water in the Glow Discharge — Ernest G. Linder 679
Polymers and New Infrared Absorption Bands of Water — Joseph W. Ellis 693
Absorption of Light by Flames Containing Sodium — C. D. Child 699

Note on the Heat of Dissociation of Iodine – WELDON G. BROWN 709
Low Voltage Excitation of Sodium – WALTER C. MICHELS 712
On the Relative Abundances of Isotopes – HAROLD C. UREY AND CHARLES A. BRADLEY, JR. 718
Note on the Light Quanta and the Electromagnetic Field – J. R. OPPENHEIMER 725
Role of Quadruple Forces in van der Waals Attractions – HENRY MARGENAU 747
Intensity Summation Rules and Perturbation Effects in Complex Spectra – GEORGE R. HARRISON AND M. H. JOHNSON, JR. 757
Schrödinger Potential Function – R. M. LANGER 779
Nonstatic Model of Universe with Reversible Annihilation of Matter – RICHARD C. TOLMAN 797
On Dissipative Systems and Related Variational Principles – H. BATEMAN 815
Resistivity of Single Crystal Zinc – E. P. T. TYNDALL AND A. G. HOYEM 820
Magnetic Properties of Copper-Nickel Alloys – E. H. WILLIAMS 828
Letters to the Editor – 832

Laue Spots from Perfect, Imperfect, and Oscillating Crystals, *Charles S. Barrett*—832; The Magnetic Anisotropy of Ions of the Type XO_3, *K. S. Krishnan*—833; The Production of High Speed Protons Without the Use of High Voltages, *Ernest O. Lawrence and M. Stanley Livingston*—834; The Refraction of the Copper *K*-Series by Quartz, *J. A. Bearden*—835; Note on the Interpretation of the BeF Bands, *Robert S. Mulliken*—836; The Absence of Spin in Nuclear Electrons, *R. M. Langer*—837; Emission and Absorption Spectra in Sulphur Dioxide, *T. C. Chow and H. D. Smyth*—838; Temperature Dependence of Photoelectric Effect in Metals, *L. A. Young and N. H. Frank*—838; A New *K*-Series X-ray Line Due to Fermi-Sommerfeld Electrons, *Jesse W. M. DuMond and Archer Hoyt*—839.

Book Reviews – 842

SEPTEMBER 1, 1931

First Spark Spectrum of Rubidium (Rb II) – OTTO LAPORTE, GEORGE R. MILLER, AND RALPH A. SAWYER 843
Nuclear Spin of Potassium – F. W. LOOMIS AND R. W. WOOD 854
Isotope Separation in the Spectra of Li I – D. S. HUGHES 857
Energy Relations in Complex Spectra – DAVID R. INGLIS 862
Ultra-Ionization Potentials in Mercury Vapor – A. G. SHENSTONE 873
Excitation Probabilities for Electrons in Helium, Neon, and Argon – L. C. VAN ATTA 876
Effect of Temperature on the Continuous Band Spectrum of Mercury Vapor – WALTER M. NIELSEN 888
Spectral Fluorescence Efficiencies of Certain Substances with Application to Heterochromatic Photographic Photometry – GEORGE R. HARRISON AND PHILIP A. LEIGHTON 899
Effect of Varying Concentrations of Certain Electrolytes on the Violet Band of the Raman Spectra of Water – C. C. HATLEY AND DIXON CALLIHAN 909
Satellites of *M*-Series X-ray Lines – F. R. HIRSH, JR. 914
New Effect Produced by Action of X-rays on Matter – G. I. POKROWSKI 925
X-ray Study of the Magnetic Character of Liquid Crystalline Para-Azoxyanisol and a Comparison with the Isotropic Liquid – G. W. STEWART 931
Measurements on the Vapor Stream from the Cathode of a Vacuum Arc – W. E. BERKEY AND R. C. MASON 943
Electrodeless Discharge: Method of Measuring Induced Current, Variation of Current with Pressure for Various Gases – CHARLES T. KNIPP AND JULIAN K. KNIPP 948
Life of Metastable Mercury and Evidence for a Long-Lived Metastable Vibrating Nitrogen Molecule – M. L. POOL 955
Ionization of Kr and Xe by Positive Alkali Ions and the Ionization Potentials of Ne, A, Kr, and Xe – OTTO BEECK AND J. CARLISLE MOUZON 967
Aging of Ions in Air and Nitrogen – JOHN ZELENY 969
Reflection of Mercury from Alkali Halide Crystals – H. A. ZAHL AND A. ELLETT 977
Low Temperature Rotational Heat Capacities and the Relative Amounts of the Nuclear Singlet, Triplet and Quintet Symmetry Modifications of Methane – D. S. VILLARS AND G. SCHULTZE 998
Acoustic Resonator Interferometer: I. The Acoustic System and its Equivalent Electric Network – J. C. HUBBARD 1011
On the Strain-Energy Function for Isotropic Bodies – C. KAPLAN 1020
On the Increase in Surface Area Due to Crystal Faces Developed by Etching – LEWI TONKS 1030
Crystal Structure of Sodium Nitrite, $NaNO_2$ – G. E. ZIEGLER 1040
Light of the Night Sky – JOSEPH KAPLAN 1048
Stability of the Atmosphere of a Rotating Star – ROSS GUNN 1052
Dielectric Constants of Certain Organic Liquids at Medium Frequency – W. R. PYLE 1057
Letters to the Editor – 1071

Relation Between the Scattering of X-rays by Gases and Crystals, *G. E. M. Jauncey and G. G. Harvey*—1071; Reflection of Electrons by a Special Potential Field, *E. L. Hill*—1072; Quantization of Large Scale Events, *David L. Watson*—1072; The Emission of Positive Ions from Cu and Ag, *H. B. Wahlin*—1074; The Alternating Intensities of N_2 Bands, *Harold C. Urey*—1074; The Red CN Band System, *F. A. Jenkins, Yale K. Roots, and Robert S. Mulliken*—1075; Reaction Due

to Gas Molecules Leaving the Cathode of an Arc, *B. Wellman*—1077; Angular Distribution of Photoelectrons, *A. Sommerfeld*—1078; The Effect of Piezoelectric Oscillation on the Intensity of X-ray Reflections from Quartz, *S. Nishikawa, Y. Sakisaka and I. Sumoto*—1078; A New Criterion for Predissociation, *Joseph Kaplan*—1079; Predissociation in Nitrogen and Excitation of the Green Auroral Line, *Joseph Kaplan*—1079.

Book Reviews — 1081

SEPTEMBER 15, 1931

Diffraction of X-rays in Organic Mixtures — Alfred Wesley Meyer 1083
Dependence of Compton Line Breadth on Primary Wave-Length with the Multicrystal Spectrograph — Jesse W. M. DuMond and Harry A. Kirkpatrick 1094
Molecular Energy Levels and Valence Bonds — J. C. Slater 1109
Allowed Levels for Equivalent (s, p, d, f) Electrons with (jj) Coupling — Samuel D. Bryden, Jr. 1145
Zeeman Effect in the Ortho-Helium Band Spectrum — John S. Millis 1148
M-Series Absorption Spectrum of Tantalum — Charles A. Whitmer 1164
Band Spectrum of Benzene: Existence of a Small Vibrational Frequency in the Normal State — C. V. Shapiro, R. C. Gibbs and J. R. Johnson 1170
Vibrational Quantum Analysis of the Visible Absorption Bands of Bromine — Weldon G. Brown 1179
Infrared Absorption Band System of Iodine — Weldon G. Brown 1187
Ultraviolet Bands of CO in the Electrodeless Ring Discharge—H. P. Knauss and J. C. Cotton 1190
Intensities of Balmer Emission Lines in Stellar Spectra — Otto Struve and Harold F. Schwede 1195
Transmission of Electrons Through an Electrical Condenser — W. Wetzel 1205
Vectorial Photoelectric Effect in Thin Films of Alkali Metals — Herbert E. Ives 1209
Plasma-Electron Resonance, Plasma Resonance and Plasma Shape — Lewi Tonks 1219
Dielectric Constant of Liquids under High Pressure — W. E. Danforth, Jr. 1224
Supersonic Satellites and Velocity — W. H. Pielemeier 1236
Intercomparison of the High Temperature Scale — W. E. Forsythe 1247
Thermocouples Whose Elements are Longitudinally and Transversely Magnetized Ferromagnetic Substances — Stewart Seass 1254
Letters to the Editor — 1258

One-Dimensional Problems in Quantum Mechanics; *E. L. Hill*—1258; Hyperfine Structure and Nuclear Moment of Rhenium, *W. F. Meggers, A. S. King and R. F. Bacher*—1258.

Book Reviews — 1260

OCTOBER 1, 1931

X-ray Absorption by a Thomas-Fermi Atom — Louis C. Roess and E. H. Kennard 1263
Periodic System of Atomic Nuclei and the Principle of Regularity and Continuity of Series — William D. Harkins 1270
Multiplet Structure and Zeeman Effect — J. B. Green and R. A. Loring 1289
Rotational Analysis of the First Negative Group of Oxygen (O_2^+) Bands — Daniel S. Stevens 1292
Secondary Emission from Nickel by Impact of Metastable Atoms and Positive Ions of Helium — Marshall C. Harrington 1312
Scattering of High Velocity Electrons by Thin Foils — H. V. Neher 1321
Capture and Loss of Electrons by Helium Ions in Helium — Philip Rudnick 1342
Ionization of Caesium Vapor by Light — F. W. Cooke 1351
Some Electrical Properties of Spectroscopically Pure Zinc Crystals — A. G. Hoyem 1357
Internal Molecular Potential between the Substituent Groups in a Benzene Ring as Derived from the Heats of Combustion — H. A. Stuart 1372
Further Application of Huang's General Equations of Energy and Entropy of Gases: The General Adiabatic Equation of Gases — Tzu Ching Huang 1385
Letters to the Editor — 1387

Intensity of Raman Lines in Estimating the Concentration of the Components Present in Benzene-Toluene Mixtures, *Elizabeth A. Crigler*—1387; X-ray Diffraction Patterns of Mixtures, *A. W. Kenney and Henry Aughey*—1388; A New Method of Producing Negative Ions, *James S. Thompson*—1389; Variations in the Grating Constant of Calcite Crystals, *J. A. Bearden*—1389; Thermocouples of Longitudinally and Transversely Magnetized Wires, *C. W. Heaps*—1391.

Book Reviews — 1392

OCTOBER 15, 1931

New Experiment Bearing on Cosmic-ray Phenomena — L. M. Mott-Smith and G. L. Locher 1399
Effect of General Radiation in the Diffraction of X-rays by Liquids — W. C. Pierce 1409

Higher Order Effects in the Diffraction of X-rays by Liquids — W. C. PIERCE 1413
Regular Reflection of X-rays from Quartz Crystals Oscillating Piezoelectrically — GERALD W. FOX AND JAMES M. CORK 1420
Scattering of X-rays from Paraffin, Aluminum, Copper, and Lead — ALLEN W. COVEN 1424
Infrared Bands of Slightly Asymmetric Molecules — HARALD H. NIELSEN 1432
Absorption Band in Ethylene Gas in the Near Infrared — RICHARD M. BADGER AND JOHN L. BINDER 1442
Magnetic Rotation Spectrum and Heat of Dissociation of the Lithium Molecule — F. W. LOOMIS AND R. E. NUSBAUM 1447
Shot Effect in Photoelectric Currents — B. A. KINGSBURY 1458
Photoelectric Effect from Thin Films of Alkali Metal on Silver — HERBERT E. IVES AND H. B. BRIGGS 1477
Contact Potential Difference between Iron and Nickel and their Photoelectric Work Functions — G. NORRIS GLASOE 1490
Equilibrium Distribution of Potential and of Electrons Outside the Surface of a Conductor — A. T. WATERMAN 1497
Electro-optical Shutter. Its Theory and Technique — FRANK G. DUNNINGTON 1506
Optical Study of the Formation Stages of Spark Breakdown — FRANK G. DUNNINGTON 1535
Structure Sensitiveness of Magnetism in Metals — F. E. LOWANCE AND F. W. CONSTANT 1547
Entropy of Polyatomic Molecules — DONALD STATLER VILLARS 1552
Letters to the Editor — 1565

Ionization as a Function of Pressure and Temperature, *A. H. Compton, R. D. Bennett and J. C. Stearns*—1565; The Constancy of Cosmic Rays, *R. D. Bennett, J. C. Stearns and A. H. Compton*—1566; Thermionic Emission from a Plane Electrode, *Russell S. Bartlett*—1566; Radioactive Disintegration, *Arthur Bramley*—1567; An Electrical Field Giving Uniform Deflecting Force on a Molecular Beam, *Edwin McMillan*—1568; The Metamagnetism in Bismuth Crystals, *A. Goetz and A. B. Focke*—1569.

Book Reviews — 1573

NOVEMBER 1, 1931

Comparison of Viscosity and Molecular Arrangement in Twenty-Two Liquid Octyl Alcohols — G. W. STEWART AND R. L. EDWARDS 1575
Brownian Motion of Strings and Elastic Rods — G. A. VAN LEAR, JR. AND G. E. UHLENBECK 1583
Transition Probabilities and Quenching in the 3*P* State of Sodium — N. E. BERRY AND G. K. ROLLEFSON 1599
Note on Local Momentum in Wave Mechanics — LLOYD A. YOUNG 1612
Valence Forces in Lithium and Beryllium — J. H. BARTLETT, JR. AND W. H. FURRY 1615
Many-Electron Wave Functions — JAMES H. BARTLETT, JR. 1623
Spectra of Two Electron Systems — M. H. JOHNSON, JR. 1628
Zeeman Effect in Intermediate Coupling — D. R. INGLIS AND M. H. JOHNSON, JR. 1642
Absorption Spectra of Salts in Liquid Ammonia — R. W. WOOD 1648
Appearances of the Forbidden Lines and the Intensity Modifications of the Spectra of Mercury, Cadmium and Zinc under High Frequency Excitation — J. OKUBO AND E. MATUYAMA 1651
Diffusions of Electrons Back to an Emitting Electrode in a Gas — IRVING LANGMUIR 1656
Average Life of the Ionized Helium Atom — LOUIS R. MAXWELL 1664
Mass Spectrograph Analyses, and Critical Potentials for the Production of Ions by Electron Impact, in Nitrogen and Carbon Monoxide — ALFRED L. VAUGHAN 1687
Emission of Negative Ions under the Bombardment of Positive Ions — K. S. WOODCOCK 1696
Residual Ionization in Nitrogen at High Pressures — JAMES W. BROXON 1704
Doppler Effect in the Canal Rays in Neon — W. ROMIG 1709
Velocity Spectrum of Normal Gaseous Ions in Air and the Problem of Ionic Structure — LEONARD B. LOEB AND NORRIS E. BRADBURY 1716
Mass of Positive Ions in a Glow Discharge — OVERTON LUHR 1730
Molecular Scattering of Light from Amorphous and Crystalline Solids — ALEXANDER HOLLAENDER AND JOHN WARREN WILLIAMS 1739
Interpretation of the Selective Photoelectric Effect from Two Component Cathodes — A. R. OLPIN 1745
On the Theoretical Requirements for a Periodic Behaviour of the Universe — RICHARD C. TOLMAN 1758
Permanent Electric and Magnetic Moments of Crystals — F. ZWICKY 1772
Letters to the Editor — 1782

The Magnetization of Colloidal Suspensions, *Carol G. Montgomery*—1782; Equivalent Electrical Networks, *O. Brune*—1783; Reaction Due to Gas Molecules Leaving the Cathode of an Arc, *R. C. Mason and W. E. Berkey*—1783; The Structure of the Water Vapor Molecule, *E. K. Plyler*—1784; Diamagnetic Susceptibility of the Rare Gas Atoms According to Slater's Method, *Susil Chandra Biswas*—1784; The Equation of State of Real Gases, *Henry Margenau*—1785; Auto-Ionization in the Noble Gases and Alkaline Earths, *H. E. White*—1786; On the Range of Fast Electrons and Neutrons, *J. F. Carlson and J. R. Oppenheimer*—1787; The Calculation of the Characteristic Frequency from the Coefficient of Compressiblity, *J. B. Austin*—1788; Crystalline Rubber Hydrocarbon, *E. W. Washburn*—1790; Note on the Crystal Structure of Arsenic Triiodide, *Dorothy Hey-*

worth—1792; Periodic System of Atomic Nuclei and the Principle of Regularity and Continuity of Series. A Correction, *William D. Harkins*—1792; A New Criterion for Predissociation. A Correction, *Joseph Kaplan*—1792.

Book Reviews – 1793

NOVEMBER 15, 1931

Structure of Soft X-ray Lines – – – – – – – – – – WILLIAM V. HOUSTON 1797
Upper Atomic-Number Limits for Satellites of the X-ray Line $L\beta_2$ – R. D. RICHTMYER 1802
Dispersion of X-rays in Calcite – – – – – – – – – – LOUIS A. PARDUE 1808
Faint Branches in the OH Bands – – – – – – G. M. ALMY AND G. D. RAHRER 1816
Investigations in the Far Infrared – – – – – – – – – – JOHN STRONG 1818
Infrared Spectrum and the Molecular Configuration of N_2O E. K. PLYLER AND E. F. BARKER 1827
Raman Effect in Certain Organic Compounds – – – – – – – – M. E. HIGH 1837
Raman Effect and the Carbon-Halogen Bond – WILLIAM D. HARKINS AND HAROLD E. BOWERS 1845
Emission of Secondary Electrons from Tungsten – – – – – – – A. J. AHEARN 1858
Determination of the Photoelectric Threshold for Tungsten by Fowler's Method – – – – – – – – – – – – – – – – – – –

DECEMBER 15, 1931

Grating Constant of Calcite Crystals – – – – – – – – – J. A. BEARDEN 2089
Normal State of the Hydrogen Molecule – – – – – – – – – – N. ROSEN 2099
Note on the General Solution of Schrödinger's Equation and the Uncertainty Principle – E. L. HILL 2115
Electronic Transitions between an Inner Shell and the Virtual Outer Shells of the Ions of the Rare Earths in Crystals – – – – – – – – – – – – SIMON FREED 2122
Absorption Spectrum of Chlorine Dioxide – – – HAROLD C. UREY AND HELEN JOHNSTON 2131
Rotational Structure of the Red Bands of Potassium – – – – – – F. W. LOOMIS 2153
High Resolution in the Infrared – – – – – – – – – – – – J. D. HARDY 2162
Raman Effect for Benzene Substitution Products by Improved Technique – R. W. WOOD 2168
Paschen-Back Effect of Hyperfine Structure I. Thallium II and III – J. B. GREENAND JOHN WULFF 2176
Paschen-Back Effect of Hyperfine Structure II. Bi II and Bi III. – J. B. GREEN AND JOHN WULFF 2186
Phenomena in Oxide Coated Filaments II. Origin of Enhanced Emission – J. A. BECKER AND R. W. SEARS 2193
Wave-Length Standards in the Spectra of Aluminum. Silicon and Bismuth in the Schumann Region – R. V. ZUMSTEIN 2214
Certain Spectra in the Vanadium I Iso-Electronic Sequence – – – HELEN T. GILROY 2217
New Type of Crystal Fine-Structure: Lithium Ferrite ($Li_2O \cdot Fe_2O_3$) – E. POSNJAK AND TOM. F. W. BARTH 2234
Natural Units for Atomic Problems – – – – – – – – – – – ARTHUR E. RUARK 2240
Some Physical Properties of Compressed Gases. II, Carbon Monoxide. – W. EDWARDS DEMING AND LOLA E. SHUPE 2245
Reciprocal Relations in Irreversible Processes. II. – – – – – – – LARS ONSAGER 2265
Problem of Rotating Magnets – – – – W. B. PIETENPOL AND E. C. WESTERFIELD 2280
Letters to the Editor – – – – – – – – – – – – – – – – – – –
